Medical billing is the process by which insurance companies submit claims and follow up on them so that they ultimately receive the monies owed for services rendered by a healthcare provider. Billing and Medical CodingBilling and coding are actually two different processes. Coding entails examining clinical statements and issuing codes for medical
procedures and doctor or hospital visits on a classification system. A coder has to wade through records and notes from a patient and determine the proper coding based on a patient's diagnosis and/or procedures performed during their medical-related visit. The biller takes the information from the medical coder and creates a medical claim, which
must meet the standards of billing compliance. Medicaid can be a bit more daunting, since each state has its own billing requirements. It can be difficult to determine a patient's Medicaid eligibility status, according to Dummies. Many Medicaid policies are secondary to Medicaid eligibility status, according to Dummies.
coded and submitted to Medicare before determining if Medicaid needs to, or even can, kick in. A Day in the Life of a Medical Biller Medical billers typically work in hospitals or doctors' offices, so there is generally lots going on beside the job at hand. In between being asked a bunch of questions from patients waiting to be seen, a biller needs to get
about their business — reviewing patient accounts, seeing if any are way past due and need to be sent to collections, printing out and mailing bills, checking on claim status reports, taking phone calls from potentially angry patients who have questions about their bill and much, much more. A medical biller constantly has irons on the fire and must
figure out the best way to attend to them all. A Day in the Life of a Medical CoderMany medical coders work from home, which helps eliminate the distractions that billers contend with. Patient charts are sent electronically. A coder must wade through all the information in the chart, make sense of it, and assign to proper codes. Often a coder will keep
sources of information nearby to help with unfamiliar diagnoses. There can be a lot of stress with this job, especially if your employer expects a certain number of charts to be completed per day. How Does a Person Get into the Field? A common pathway to get into the field of billing or coding is to complete an associate's degree or a one-year
certificate program in medical billing and coding. The coursework allows students to familiarize themselves with medical insurance, Medicare and Medicaid. Students are introduced to commonly used classification systems necessary for coding. MORE FROM
QUESTIONSANSWERED.NET Unbiased Online Degree Reviews: Early Childhood Education - May 24, 2019 I enrolled in their CDA program. I completed some work, but decided to cancel the day after because my company told me that this is not one of the colleges that they're partnered with, in order to get
tuition reimbursement. In the policy, it states that I owe them a balance of $130, WHAT? Keep in mind that I was on a payment plan for $599 (the total cost of the course), and had only made my first payment of $20. My
next payment was due a month from then. Since I cancelled the course, I should not have been submitted my refund of $20. I will be leaving every bad review about this company, as well as taking the proper precautions to sue them. THE WORST college and not even accredited, save your time and money! 72 of 114

review helpful Basic Electronics - May 12, 2018 I have always wanted to go back to college. Being married and raising 2 kids, I was not able to go to college. I have worked as an electrician for 30+ years, but was always hamstrung when it came to electronics. I came across this diploma in Basic electronics and thought, for under $700 and it includes books, testing materials, a meter and electronic supplies, I can't go too wrong. So far the course has been very informative, even though at this point I have only covered the basics. That's OK though, because I needed a refresher course on a lot of these. It looks like a lot of complaints are by people who did NOT read the terms of service and the rules.
It plainly states that if you can't finish your semester within a year, there will be an upcharge if you want to extend it. Of course, from all the bad ones are IN ALL CAPS, horrible punctuation, horrible spelling and a really bad sentence structure. I'm surprised any of them are literate and could
read at all, or comprehend what they actually read. I did not give everything a high score, I gave some of them a score somewhere in the middle because I have not had to deal with teachers at this point. The support I have had to get has been through the student portal and have had every question answered. I went through my employer to apply for
reimbursement and they signed off on the reimbursement if I get at least a "C" on my courses. I am impatiently waiting for my supplies to arrive in the mail today so I can continue with my studies (I'm at 47% is a little over a month). I am sure things will slow down, but that gives me time to review what I have already been graded on. One last thing,
you get what you give in anything in life. I will tell you one thing, any college you attend does not give a hang about whether you pass or fail. They got their money, so they are like a brick and mortar school. If you do not want to work, do NOT sign up for this schooling. READ THEIR TERMS OF SERVICE (if you have at least the basic reading
comprehension). If my opinion changes, I will do a new review. Peace ... that is all... 86 of 90 people found the following review helpful Security Management - August 3, 2017 Learning Disabilities; therefore, this was an appropriate

I have experienced discrimination from many institutions, due to being (LD). However, Ashworth's online design prevented that from occurring. I also graduated from James Madison high school in 09, which is their (RA)

I can say with over 7 colleges under my belt as a result
over the term of my years to completing a degree program. No, I hadn't failed, told to leave, or administratively separated from any college. I am retired military and had relocated in my tenure of service to complete a degree over time. First and foremost, read, read, any college catalog prior to applying. Ask around, do RESEARCH!!! Call
colleges and talk specifically with the admissions, copy all classes that you would need to transfer from one colleges to which they accept. Demographically most colleges are separated by regions from east to west and vice versa. Some colleges will accept
almost any transcript, in most cases classes do not transfer credit, as the college needs to make money, and requirements that need to be met by that specific college. If memory serves me the DoE has/had a map of school regions for monetary supplementation and is/was a great source to follow for accreditation by region. As with Ashworth, no
credits would have been taken for the colleges I had attended. So I stopped for the benefit of using my funds towards a degree I was earning that would transfer. Again, some colleges on the east coast did not take my credits from the central west colleges on the east coast did not take my credits. At a later point I started reviewing each
college for the best options and transfer credits before filing one admission form and starting classes (the ominous catch all from admissions "sure they will transfer no problems!"). Another item that helped after I attended Ashworth and attending other colleges is if you feel hands on training is not sufficient for the course, contact a local college
and/or apply for student work towards the field of study, or outside agency. By large a vast majority of students have taken small internships or work programs through vendors to help build a foundation to what you are learning. Case in point during after class hours instructors were looking for students to help build a foundation to what you are learning.
Comm. College accepted that I was a student through Ashworth and needed the knowledge. The staff was very helpful and, although I was not an intern or working through the college... I had the opportunity to work first hand in my career path. A side note, For Profit colleges are just that, they want money and will drive a degree plan to make the
greater income for the college. Although most FPC hire instructors that are well paid in the private sector for leading application. I have seen a total of four Ashworth degree holders, all have advanced in their experience, increased job related skills to become marketable, and starting pay was
higher then those that walked in from the street. The person makes the degree. Many jobs look for the persistent, educated, follow through worker/manager employee...that you had the tenacity to finish what you start. The college was not a place holder to the job. Applying the knowledge and workplace efficacy carries the weight. Take a look into the
mainstream business or corporation, read articles from top executives and HR, talk to recruiters, and take a pronounced effort into your workforce. The guidance is out there. In the end its you that will make the grade and stand out from the rest. 37 of 41 people found the following review helpful Vetinary Assistant - November 29, 2016 All this

I was never able to get ahold of anyone, my teacher, customer service, no one. When I finally got into contact

Finally, I check credit karma and they sent me to collections, claiming I owe them $600 for classes. WHAT?!!! Now my credit score has dropped

online college to earn my degree. I chose online college and it was the best decision! I find myself to be a truly independent person who likes to have flexibility. When I chose this route of education, it has given me big opportunities! I am a dedicated student to my schoolwork but I also am able to begin my career earlier than my former fellow
students. I am currently in pursuit of earning my degree in Business with a concentration in healthcare and doing so has afforded me the ability to land an amazing job at a hospital where I have the chance to grow in several areas while I work on my degree. When speaking to my potential employers about it, they were over the moon about it because
they know I can gain the experience while working in the healthcare industry. This I feel, Is such a treasure because I am able to have more than the general traditional college student. Not only that, but with the advanced and challenging programs Ashworth has, I have the chance to graduate earlier. In this aspect, this is the smarter way to go. I feel
as though the education I am receiving is quality. The affordability is just a bonus in my eyes, its the education that counts. I find myself learning more than I ever thought I could and its been very beneficial in several areas. I really enjoy the materials I receive, they are thorough in what they contain and they are brand new from known publishers. If I
was ever in need of assistance, The advisors were always very respectful and helpful on the occasional basis. personally, I have had a truly fantastic experience. I will say it point blank, it is an excellent school in my personal opinion. I decided to enroll because I wanted true education that I could accomplish independently. I am honestly proud of what I have achieved so far. I enrolled into the Business Administration/Management program with a focus in
marketing and its great, I think the only tough part I actually had with it was choosing the electives because you get to choose where you want to focus on most. The criteria is challenging but its fun nonetheless because I got to learn
into my field and pursuing my masters to bring me farther. Ashworth, I believe is truly an excellent school and I am proud to be graduating from here. Management - March 18, 2016 It started out ok and eventually ended with me withdrawing. First of all I was on the automatic withdrawal payment plan direct out of my account and they could NOT get that straight for awhile. In my 3rd semester and I could not get any help from the tutors or instructors regarding why my assignment was returned
unacceptable. The instructors handwriting was NOT legible and I was told they do not keep copies so therefore no one knew or understood what I was talking about. I could not correct the assignment to resubmit for a passing grade because I did not know what was wrong, (the instructor did not make any notes) They did not offer tutoring for that
assignment therefore I was supposed to figure it out on my own or which I could not do...(reason for me taking the course). Anyway, I called & withdrawal of which I paid - just so I could be done with this school. I'm glad I made the decision I did and

At first I was very concerned about attending Ashworth due to the negative comments I saw on the web about customer service or that its a scam. But I figured I would give it a try as I have
started and quit 3 different times. Signing up took a bit that that was expected. I took advantage of the classes in order to save money and time and money in the end. Some of the classes were
very easy for me and others took me back to studying once again. I did have to contact the school but it was due to my own issues and there policies. I never once had a negative contact with their customer service. If I felt I was right I would explain why and to my surprise they listened and ended up siding with me. I have not used my degree to move

diploma - September 30, 2014 I am the mother of a 16 year old son on the autism spectrum. When I called for info on the school the enrollment rep assured me that JMHS was the right choice for us. I asked numerous times in numero
deposit and signed my son up for the program. We had been homeschooling for a few years already but since my state did not require I keep a middle school portfolio, I didn't. When it came time to actually start classes I was told I needed to prove that he was promoted to the 9th grade. Since I had not kept a portfolio they told me he had to take an
entrance exam at a cost of $50 per attempt. He would not be able to start classes until he passed this exam. The enrollment rep knew that I had no portfolio because I told him, and he never said anything about an exam. When I called to see what could be done I was told that he had to take the test. I tried to explain and find out if we could start
classes and take the test a bit later and was told no. At this point I started to realize that there were no accommodations for special needs kids. I then asked the woman I was speaking to if the enrollment reps worked on commission and she said yes. So basically they say just about anything to get you to enroll. I was told that there would be a $275 fee
to cancel my enrollment. Since they already had $100 of mine, the balance was $175. I had no intention of paying this and told them so. They said I could write a letter to a certain person if I had a dispute. I wrote the letter and didn't hear back for a while. In the meantime they called just about every day to collect. When I finally did hear back I was
told they would not make me pay the balance, but I would not get my $100 back. I called the person in charge one more time but was denied. This school is not about academics or honesty... its about making money. And they don't care who they hurt to do it. September 5, 2014 I really feel like I must write a review on Ashworth College. No, they are not Harvard nor are they the top of the line in any way BUT I payed $700 to get a diploma so I could gualify to take an exam to become certified. I don't feel like I was ripped off, I got what I paid for. I took the course and passed the NHA exam and now I can
put the credential on my resume to get a better job. Since then I have decided to take their EHR management course to become a CEHRS (which I am almost done with), the medical billing and claims course and I am going there to get a bachelors in psychology. ALL these things will help me have a much higher ability of success in the working world.
They are an accredited institution and if you don't believe me then Google the list of recognized non-accredited institutions/ scams/diploma mills because it's not on there. I appreciate having the option of not taking out anymore loans to further the pain of my crippled credit score. I went to a very pricey institution when I was younger and it wasn't
perfect either. I hate the fact that I have no idea who my teacher is and I actually just pretend like I am my teacher and if I don't like my text book I will go on Amazon and buy a better one. I need school for a better life, and Ashworth College is giving me that opportunity at a price I can actually pay. It will work it you make it, it's not for the lazy or for

change your mind you will get charged 225.00. This school is horrible they don't respond to online questions either and when they do its not Much help. school diploma - August 22, 2014 I have home schooled 2 of our sons through high school using American School. They raised their rates. So we switched to Ashworth for son #3. Bad move! He has been complaining all along that many of the questions in the study guides and exams are not to be found in the textbook readings. I confirmed this. We
had to google to find some answers! My BIGGEST complaint though, I feel is a very SERIOUS one!! After son completes exams in the Exam Book, I log on to his account with Ashworth and he reads off his answers and I enter them. Several times now he has had answers marked WRONG and we both checked them and found there is no way they are
wrong!! So I called Ashworth's Student Services and was told they would connect me to an Academic Adviser and she would make the adjustments. Was told "They do it all the time"... um, ok.... So sure enough the "Adviser" found both of my son's answers were marked incorrectly and she "gave him credit for both. That makes his new grade a 96." I
replied, "Uh, he had only 2 answers wrong and you gave him credit for both. Doesn't that make his new grade a 100?". "oh, ya, sorry, 100". So as a parent, I not only have to double-check the computer but the Academic Adviser as well? So, I asked this "adviser" how my son could be giving correct answers yet having them marked wrong. She said "its
a computer glitch". Ok "So how can I have confidence that ANY of his exams are being graded accurately?" She replies, "It's a computer glitch. It happens. That's why we advise students to review their answers after completing exams." So, the educational institution is allowed to essentially be "dumber" than the student? It's up to the STUDENT to
correct the school system that you paid tuition to attend????? My last child will be starting high school in 2015. I WILL NOT be enrolling her in Ashworth! 20 of 27 people found the following review helpful AS Criminal Justice. I have been a

College (July 2014). The textbook and information packets came within 2 business days. I do not have much to say about the college itself other than that the grading was horrendous. During my course, the tests were all online multiple choice that were instantly graded and answers shown; however, the final project which was just a written report
about employment opportunities was a sham. It took more than a week to grade. The textbook was great and detailed. It seemed that some of the content and pictures especially were from the 1990's, granted most concepts still apply today. This is a great foundations course, but definitely not from someone aspiring to become a carpenter. You should
go to an actual carpenter class/school and not take an online course where there are no hand-on activities. The textbook on Amazon.com is only $30 so you should start by buying that and reading every chapter instead of taking this course. There are no extra supplements except the textbook and the pamphlets for each section that do not provide any
extra information. Essentially you are paying for the "diploma" because the college does not offer anything extra. The textbook is the ONLY source of information and is all self-paced reading. So you are paying for Ashworth to tell you to read which chapters next. The only benefit of taking this course is to get a diploma at the end. All in all, if you want
to actually learn carpentry and work as a carpenter, you should take a real hands-on-in-person course and NOT online. If you want to learn the foundations of carpentry as a hobby or self-education, then buy the textbook on Amazon.com and read it for yourself. You do not need to pay hundreds of dollars to Ashworth just to have them tell you which
chapters to read first. 25 of 31 people found the following review helpful Web Development - July 11, 2014 I have been enrolled for an entire year at Ashworth. At the beginning I was disspointed because I felt like they had forgotten about me however I

up, took 3 weeks to get that resolved. First course of semester 4 I cud not get the assignments to come up complete. I messaged and was told no that is right you are ok to submit. I submitted and failed the assignment is messed
with and the instructor is refusing a submission and since I didn't pass that one element even though I have a b for the course, I am once again fighting them this time to get that course closed so I can move on. She had issues getting tooks the whole first semister. She got two books 2 weeks after enrolled then she was late December early January getting the last book she
needed. Then started this last book and called questioning numerous times why information in the book and teachers notes didn't match up with the information for the tests. Finally after she completed 6 of 8 lessons they told her they updated the workbook/testbook and would send her a new one. She finally got it 2 or 3 weeks ago. She called
because some of the tests for the class were reset but was told if she didn't fail them not to retake them because if she did they highest score she could get would be a 60% on each of them....OK so they mess up she's stuck with a lower grade then she should have because of there book problem. So she finished the semister with 2 A's and 2 B's which
both were only one percent away from and A in those classes and then supposedly fails her 3 classes of the 5 classes in the exam???? Doesn't make sence and now she is already a month behind because of all
the issues with this class and this will set her back farther as she only has one more chance to pass the test or has to repeat the semister. For the complaints about mail and deliveries I have a solution for you. Each class is about 8 exams and 2 essays. If you can get a zero on your
final exam and still pass they will ship you your next book to you. I would always keep a high enough average so that by the time I did complete my bachelors Degree in 29 months. That's 40 classes while also graduating with a 3.10 gpa. I also worked full time 40 plus hrs a
week. On average I only took 7 days off a yr. I looked at my education as a part time job because in a way it was. I spent around 10 -15 hrs a week on each class. I must admit they were times when I wanted to give up, but now that I have a degree hanging on the wall it was all worth it. Bottom line is that if you are discipline and dedicated you will be

difficulties finding a job could be frustrating. I enjoy my program and thus far have had no problem transferring credits. I've also been granted the opportunity to do "CLEP" type exams to test out of classes. In the end, I will end up taking maybe 1/2 of the program. My issue with Ashworth is the timeliness and the customer service. The answers vary
by person and they never match up. If you speak to 3 representatives in a day, you're guaranteed to get 3 dramatically different answers. Also, if it takes 7-10 business day rolls around, you're told that sometimes it can take a bit longer and
that you need to be patient. Another pet peeve is the course process. You take 1-2 courses at a time and then wait 7-10 business days to get the book. Often, it'll take longer to get the materials than it would to take the course. Other than the extremely delayed grading process and the poor and inconsistent customer service, I'd say I'm pretty satisfied.
The registrars are pretty helpful and if you call enough, you can get answers. The student portal is an awesome tool btw. I like that Ashworth a scam?". Think about it. 19 of 20 people found the following review

Most of the time it's not the school that's the people who went and couldn't do their work and got mad and now want to bad mouth this college. Ashworth College is accredited and it's a great school. You call and get a different person everytime and nobody gives the same answer as the other. I pay for my tuition within two weeks of

else!!! 11 of 13 people found the following review helpful Criminal Justice - June 22, 2013 Ashworth's customer service was bar none the
most inept I have had the displeasure in dealing with. 8 months to receive an accurate contract. Now we're talking about just a couple of bucks here, we're talking hundreds of dollars. Originally when I called the enrollment operator (which by the way this number they will answer almost immediately, big surprise), my request was fairly simple
and straight forward, or so I thought. I informed the operator I was a returning student (to get the returning additional fees, but they didn't
even get the discount for returning student right. So now your thinking as I was no big deal shoot them an email and move on, wrong. • First I was informed that a supervisor would have to listen to my recording (evidently the on-line operators were not capable of doing the math that was presented, believed what I was saying, or permitted to act on
their own), and that it would be more weeks before I hear back. • After 30 days of silence, in hopes to draw someone's attention to my plight, I disputed my credit card fees and returned my books. And yet again nothing, no why did you do that, hey we're going to charge you a cancelation fee, nothing. Now to my surprise I started receiving email
notices requesting address up dates. Evidently this is a completely different department that does not communicate with customer services. So I again sent an email to let them know my address is correct, but my Enrollment Agreement contract was not. • This time I was told the "Accounts Receivable Deportment" would be addressing why I could
not receive an accurate Contract. Figuring that maybe I rushed the school to much originally, I allowed 90 days this time to hear a response from someone, again nothing but silence. At this point I figure I need to take this up the chain o command a little. • I contact and file a complaint with one of Ashworth's accrediting institutions the "Distance
Education and Training Council" through their on-line complaint web page (. They were able to make contact and put me in touch with the Business Service Manager" and explain my dilemma and she assures me there's no problem everything
will be taken care of and accepts my credit card information for full payment (for the second time). Well a week goes buy and I email the Business Service Manager and inform her that nothing has changed with my Enrollment Contract. Her response to me was, and I quote "unfortunately I cannot change the Enrollment Agreement, You will have to
sign it to be able to access your program, and there is relevance in regards to the cancellation fee etc." Now first of all is there anyone who doesn't think that if this Business Service manager was unable to change and provide me with an accurate contract, she should have told me so prior to collecting my monies? Second, I question the education of a
Business individual (of any status), who would recommend that someone sign an agreement NOT agreed upon, and then in the very same sentence they are telling you not to worry about the monies describe in the contract threaten you with enforcing said contract with cancelation fee if you do not sign said contract. I don't think even Judge Judy
could bail you out of that one. • My email response is pretty close to my above noted retort and I admit may be a little cynical but I've been through allot by this point and as if being threatened to sign the very contract I have been through allot by this point and as if being threatened to sign the very contract I have been through allot by this point and as if being threatened to sign the very contract I have been through allot by this point and as if being threatened to sign the very contract I have been through allot by this point and as if being threatened to sign the very contract I have been through allot by this point and as if being threatened to sign the very contract I have been through allot by this point and as if being threatened to sign the very contract I have been through allot by this point and as if being threatened to sign the very contract I have been through allot by this point and as if being threatened to sign the very contract I have been through all the 
One guess as to the response I received, that's right nothing, absolute silence. I receive a threat to sign on surfer the consequence of cancelation fees and the Accounts Receivable department I am becoming quite aware of the Standard Operating Procedures
(S.O.Ps.), of this organization, Ignore the problem and hope it goes away! • So now I go back to the Distance Education and Training Council and forward my emails from the Business Service Manager they had put me in touch with and again plead for some kind of assistance or avenue of direction. To my surprise it seems that the S O P of Ashworth

I finally received a call from a very charming lady who indicated she worked on second shift and would address my situation, and in which she did, by starting my account from new (which is what I had specifically requested 8 months earlier. I was a little disappointed after learning by this
time the course I was taking had reduced in price and not only was not offered the new discount price (for all my troubles), but was denied when I requested the new "As advertised" Price. 12 weeks to receive my Diploma/Transcripts Ahh, finally graduation, I completed all my lessons, or so I believed. My "Student Portal" indicates I have indeed
passed all of my course work. I awaited notification as to the conclusion of my course, some kind of announcement that all work was complete, none ever came. All of the other distant learning institutes I have been associated with immediately sent me notification of achievement upon finishing my course work, not this one. • After a week of nothing
but silence, I had to send an email inquiring as to whether or not I had actually finished my course work or if perhaps there was something I hadn't attended to. Of course I had to wait a week for any kind of response, so no it's already been 2 weeks of uncertainty. At this time (although absolutely nothing was noted anywhere within my student portal
or any of the "welcome" documentation, or any of the course material), I was now notified (after another week), that I had a "Semester exam" to take, and that I would need a Proctor (a third person involvement), and must supply contact information. • I opened my portal to address these concerns, only to find out that NOWHERE in my portal is any
information about a semester exam and/or where to input proctor information? What kind of system demands information? What kind of system demands information? Response; "there is no online source where you could add this information", One might have
thought the Education Specialist who provide the information about the exam might have at the same time provide the information directly on the original email. Now I have completed my semester exam, all is good in the world, not! Again nothing but
silence, not one word to whether or not I am actually complete this time. • Again, I sent an email inquiring as to whether or not I had actually finished my course work or if perhaps there was something I hadn't attended to. Of course I had to wait a week for any kind of response, so no it's already been 2 weeks of uncertainty. I was informed that on
the day I completed and passed my semester final that my diploma request HAD BEEN processed and that it would be 6 to 8 weeks. Another 2 months before I would have documented proof to be able to present a potential employer evidence of a furthered education! Every other distant learning institute I have been associated with sends out
Diplomas/Certificates without delay. Of course 8 weeks came and passed. I sent yet another email requesting status as to my account. Another week to await a response to find out the only intention was to submit the very same request again (because it worked so well the first time), and that it would be another 4 to 6 weeks. • Trying to expedite my
documentation, I sent yet another email describing my frustrations in hopes that someone would look into my case and accelerate my paper work. The only response received was that they had no intentions of deviating from standard practice and I would have to wait the allotted time. 7 days to receive a response to an email inquiry. Now, as you can
imagine by the above noted memoirs I have almost 6 dozen emails back and forth. 1 week per email is not hard to figure out how long this process took. And the best part (NOT), if while you're waiting for an email response you attempt a phone response (whether or not you make connection with a real person), this evidently automatically sends a
notice stating you've been taken care of and now you get to wait another whole week to get an email response. It is unknown to me the average amount of time it takes to receive a response to a phone inquiry. Every time I attempted phone contact I gave up after waiting more than 10 minutes each time. Evidently we all have unlimited talk time plans

2012 Ashworth is just the right college for me. I wanted to work in law enforcement and it did the job. I wasn't looking to go into a white collar Ivy League job. I wanted to do civil service and that's what I got. Ashworth is a great school for people who are looking for blue collar jobs. If you want to be a lawyer go else where, if you want to be a
fireman, a police officer, sanitation, secretary, paralegal or any other blue collar type job than this school is totally worth it. My partner went to a great school owes 30,000 dollars and is now a police officer. You are expected to pace your own work. You are expected to pace your book, do the chapter reviews, take notes and anything else you need to learn the material.
Make no mistake, you are homeschooling yourself. If this is not for you, do not attend this school. I have enjoyed my time with this school and I feel like I have learned much from the program I'm in. I already work in corporate management for a large sized company. Admittedly, I try to utilize every chapter of every class at work the next day. The
information has proven to hold incredible value in my career. This style of learning works great for me. I don't need much explanation and have to date, understood the material with out much need for assistance. When I have needed assistance, they have been available. I typicality get a response within about 5 business days. I don't mind this as I'm
far as E-Commerce and other technologically based courses go. Overall this is a non factor. I just have not had the bad experience that a few people seem to have a satisfactory experience. I would recommend Ashworth College to anyone interested in continuing

locks as a hobby. My employer has a Career Development program, so they paid for it. The instructor who set up the course is one of the nations top locksmiths who has published top selling books so the basic material is good. My materials did arrive prompt. Trying to get ahold of someone to talk to was a pain. The basic drawback on any online class
about locksmithing is the lack of hands on work much like a woodworking class would have. If i was super serious about being a locksmith, i would see if something like that exists. I would talk to a locksmith, i would see if something like that exists. I would talk to a locksmith, i would see if something like that exists. It will be up to YOU to practice, practice & practice installation, pin

Ashworth's James Madison Program and am currently enrolled in one of their bachelor's programs. This school has done quite a bit of updating in recent years, and not some classes are almost entirely paperless. In high school, some of the study material and test books seemed out of sync, out of date or just plain wrong. The work around was easy,
however, by doing just a little extra curricular research (which was far more enjoyable and propaganda free than reading from those old U.S. of 'Merica high school books). Overall, it was a good experience. If I had issues, I contacted the school and although wait times could be insane, customer service was always polite and understanding. I never
needed a tutor, so I can't comment on that aspect. My bachelor's program has been a breeze thus far. The important thing is still to research subjects thoroughly, using both course provided information and extra curricular reading to broaden your understanding of a
subject. It's easy to get through college by skimming paragraphs and dotting lines, but it won't do you any good in the long run. Speaking of the long run this is a nationally accredited program. So the complaints about employers rejecting the credentials are misleading, in that these are in no way fraudulent diplomas, nor is Ashworth a "degree mill"
The problem either lies with the employer's bias or lack of research, or far more commonly the lack of *state* accreditation in jobs where this is needed. For example, earning your degree in Early Childhood Ed. is useful if you're looking to join a teach-abroad program, or at a school where regional accreditation is not necessary. If I wanted to teach in
the state of Texas, I'd have to have a degree that is certified by the state (along with other state licenses.) Billing seems to be an ongoing issue with this school, but as they update this problem may disappear. It's an affordable school that gets the job done. Don't expect Harvard-level education, but don't underestimate the value of the program you
enroll in. For me, it beats the bloody hell out of attending community college. 23 of 23 people found the following review helpful Animal Care Specialist Program - July 6, 2012 I have just begun the Vet Assistant Course..so far so good, but my only issue with them so far is a inconsistency with info they gave me when i signed up.. I do understand that everyone has negative experiences. Here's my story: I wanted to get a certificate in
business management in order to get a job promotion. Well, I searched and searched. Penn Foster Career School (Online) seemed like the perfect program for me. & I was right! I loved it. It was an amazing school, and had great customer service. Well, since I did so great, I wanted to go back to get my assocciates in the same field, so I enrolled. I had
my credits transferred for the first semester, from my certificate. Well, that only left me with 1 course (5 assignments) semester, and I decided that the school wasn't right for me in that field. So, I wanted to cancel after making only 1 payment, and not taking ANY of the classes, just doing transfer credits, and had to pay for the entire semester, even
though I had done none of it. The person on the phone said, "You've already completed almost the whole 1st semester. You have to pay for what you've done." My response was haven't I already paid for it once? That's how they got transfered. So, as you can see. I did have a bad experience with a school, but I do fill like that was partially my fault and
rushed into it, which is what I feel like is most cases of these reviews. You did something to cause the school to react. You didn't pay like you were supposed, failed a subject, whatever! Ashworth is accredited. I have not even begin the program, but I plan to go to school here because the great customer service I have recieved the numerous times I
have called to ask questions. They have been awesome with me! I can't wait to start! So, before you write a negative review, think about it.. diploma - March 19, 2012 The school used to have a far superior curriculum with interesting videos, interactive practice and teacher feedback. Now they are obviously cutting corners as all they offer is an online textbook and some very poorly written tests. No feedback and no help studying the very boring text. But the worse part is that although
they changed the curriculum and have tests full of errors, they will not give a refund. So this family learned our lesson the hard way...don't EVER pay in full to get a paltry discount because you will regret it. This school is a farce and I do NOT recommend it to anyone! 12 of 14 people found the following review helpful Business Administration is

Although I am fairly new; I LOVE that the program is self-paced, affordable and no need for student loans. The staff has always been kind when I call or use the student portal. The down fall is that it takes a very long time for transcripts
to be evaluated as does the grading process (The English Comp courses are hand graded) In addition; a major issue is that students are unable to move forward into the next course until the previous course work has been graded and entered in the system. Lastly; although staff in student services tries hard to resolve issues- you can be on hold for up
to 45min. when waiting to speak with anyone in the registrars office and if you leave a message, you will probably not get called back. As long as you are very good at follow-up and communicate on a daily basis on ay issues, the school is good. 18 of 21 people found the following review helpful Business Administration - November 27, 2011 I am

Business Management - January 13, 2011 I attended Public University in Kansas prior to Ashworth. I am now a second year law student at Ivy League school at the East coast, and I credited Ashworth for the opportunity and my learning skills. expensive, especially at this Ivy league school. The good news is that I saved quite a bit by going graduating from Ashworth college last spring which kept from accumulation too much debts. 7 of 10 people found the following review helpful Early Childhood Education - December 5, 2010 I am currently enrolled in the psychology degree program. satisfied with tuition cost and course curriculum. But I take issue with some of the course material. For instance, the information on the test. Granted, there are times when you have to reason your way thru a test question. But it seems that the text
book, and test questions and answers are out of sync. This was also the case with another course. I was proactive and challenged several answers that I believed were correct, but were scored as incorrect. But I have not received a reply yet. It does seem like you are on your own, teachers are not readily available to communicate with (via email or
online blackboard). Since teachers are not available, it is impossible to obtain clarification questions for when there are inconsistencies between the text and test. Their support could use some improvement. However, their customer service reps; when
they didn't have the answer they placed me on hold to obtain it. After I finish this semester, I'll end up paying for it anyway (or they will charge a cancellation fee). Wish I had paid more attention to their cancellation fee policy...I

I called to inquire more in-depth info about the website design program here as I was
attending a diff school for this & had to change schools as that school was wasting my time & $ & what was supposed to be a 9 month program, was turning into nearly 2 years!!! So, I called Ashworth & wanted to know some more details other than what the site & course catalog explained. & was told by an admissions advisor that I couldn't get more
info unless I was a student. WTF?! I told him I'm not enrolling just to find out it's not right for what I want, & then have to back out & then go elsewhere, but he told me it was the school, & after being on hold for 5 mins., he basically connected me to his supervisor which told me the
same crap. I asked would you rather have actual students enrolled who are happy there & have all the info up front to make the right decsion, or turn them away because you cannot answer their questions? He told me the admissions dept. could answer any questions I had. I told him my experience has been that most adm. dept. people will tell you
whatever you wanna hear to get you enrolled & then you find out later: "Well. I don't know who told you that about this place, but it's wrong!" :o Don't go here! If the catalog doesn't explicitly tell you all you need to know-(which is does not)-about what you're wanting to go to school for, then chances are, you will find out the hard & expensive way that
it's all wrong for you! & BTW, my former school was the (A.I.) Art Institute of Pittsburgh, Online. Don't waste your time there either! The A.I. should stand for Arrogance & Incompetence! I spoke w/SEVERAL people from other schools who said that they had students come there that had been at the A.I., w/the same probs I had, & this was before l
even told them what school I had been at & what happened to me. All I said was I was at a diff school, & it was a waste of time & that I now needed to start all over again! I am STILL searching for a decent school to finish my website design schooling! Any suggestions? From any who've actually graduated from one, & have had a good experience
there that is? If so, please let me know! Thanks! ERIC 13 of 17 people found the following review helpful Computer Management - August 19, 2010 I graduated high school (unfortunate rebellious decision at the time) and I had no real options. The high

I then saw the commercial about PCDI and I gave them a call. After speaking with someone for about an hour I decided to sign on. The coursework was hard and I learned a lot. Before dropping out of school
I was a 4.0 student and through this program I was able to salvage a 3.6. Small hit but I did that to myself. Anyhow, I graduated and I have felt great ever since. This was took place at a time when there was no online classes really, or at least not too popular so I was ridiculed by many people. The only thing that shut them up was the fact that I got myself.

I would recommend this school to anyone in a career where time is limited and money is tight. You should check into the different requirements for your chosen career
and if you need to transfer credit to a regionally accredited school before you sign on. Some regionally accredited schools in there attempt to get your money will try and not take them but, there are some that will. I got alot more out of the Ashworth classes then I got when I attended traditional college some years ago. Students must be driven to
succeed and self motivated. Good Luck! 8 of 8 people found the following review helpful Human Resources - July 8, 2010 I graduated the associate's program earlier this year in Human Resource Management(H.R.M.) and overall everything went smoothly & I'm glad to have attended & I recommend Ashworth to my friends. My biggest problem was
with student services, some of them are unprofessional & don't seem to know what they're doing. Others are good problem solvers, so it depends on which one you get. I had to stay on top of them about my shipments but all of that's ok when considering the final prize: the college degree. Ashworth is a school for those who prefer independent study,
self pace & less structure. The cost per credit is better than any other school that I've researched and when considering the the books are included; its a very good deal. As for the credit transfer issue, you have to do your research bcuz it's different with each school. Keep in mind national accredited schools and regional accredited schools don't
usually mix. Furthermore not all of Ashworth s programs are worth taking, (do your research) example: to work in the education sector in Florida ones degree must be regionally accredited. Ashworth is nationally accredited so whoever is in Early Childhood Education @ Ashworth wont get hired at any school with ties to the state. Also I've met several
people who are embarrassed by their career diplomas in Medical Office Assisting from Ashworth. Aside from the medical and education sector jobs most employers won't mind that Ashworth is nationally or regionally accredited. It's more of a problem when transferring between schools but that's true with any school, there are no uniform standards
between schools right now. My overall exp with Ashworth has been positive enough to where I've decided to continue with then for my Bachelor of Science in Business Administration (B.S.B.A.). 14 of 14 people found the following review helpful Business Administration - May 4, 2010 I just happen to be surfing the web till this website came up and i
decided to read the review for Ashwoth University (which i am erolled in). Read the good, bad and ugly that everybody has posted and i have to say that my experience with AU has been nothing but OUTSTANDING. Teachers, they are great, i have personally chat and talked to some of my instructors in a matter of 5 mins, if that. They are very
courteous and make sure your questions are answered. Institution, enrollment was a breeze, support dept handles everything promptly and shipments arrive usually the nxt day. Support, nothing less tat outstanding, no more than 5 mins on the phone, expeditious handling of problems. Value, you can't get any better than the $1200.00 by semester,
pay up front with my Navy TA so i can't talk much about the payment plane, but for what i seen in the website, it's a good deal. Value, i already talked about it above, but to make clear the whole credit transferability, yes, they are transferability, yes, they are transferabile.
ever you make it to be, what i mean with that is te following: If you want to get a bachellors and then a masters or anything else, do your research, make calls, go to the web, etc. Plan your own career, it's your job. I personally spent a whole day calling other colleges to make sure my degree was worth my time, effort and money, if you planning to go
to law school you call them and make sure they will accept your degree before you even start it. Use of tech, costumer support is very knowlegeble with their system, online library is awesome, etc. no complains what so ever. Conclusion: I am active duty military, single dad and a volunteer firefighter, my life is tought as it is, AU have made it
convenient for me to work toward my degree, the staff and teachers are nothing less than outstanding and the course is well worth my time and money. The federal gov pays for my college, they do verify this schools before they issue payments, i highly doubt they would approve funds for a school they know is a scam. Just to throw that out there.
When i wanted to enroll in college i spend days researching my options and calling schools, also hours talking to my local Navy College Office. To the point that i contacted several federal agencies to verify acceptance of the degree i was enrolling for. If you just want to able to say "I go to College" pick one and enroll, If you want a career, start the
rigt way, research and plan it. Don't just go an enroll, screw up and blame it on the school and later than the road bad mouth it. AU Student #AC0909258, USN any 24 of 25 people found the following review helpful Legal Studies. I really enjoyed my
experience with the school from day one and feel like the self-paced learning environment fit my busy schedule perfectly. I was actually kind of hesitant to take classes online, but it ended up being not difficult at all and very convenient. The tutors were always available to help me. It's like having a personal teacher by your side the whole way, which
was great. I have already been able to put my degree to good use. I recently started working at a local law office as a Paralegal. This is the same job I've applied for over the last two years, but now that have a college degree, I was finally able to get it! I never really experienced any of the issues that some other students have mentioned. I can
definitely say that the statement about employers not accepting an Ashworth degree because it's not regionally accredited is not true at all. I'm proof of that. Depending on the job, there may be employers who have their own policies, but I've never had any issue at all with employers recognizing my degree. I mention this because I had two other
paralegal job offers that I turned down because the job I have now is the one I truly wanted. It's also nice to graduate without any debt. I have friends who work in the same field as me who still owe thousands of dollars to their schools and are working at a lower level than me. I did have to wait an extra week for a book once, but that's really the only
negative thing I experienced, which wasn't a big deal to be honest. I guess everyone's experience is a little different, but mine was really great and I'd recommend Ashworth College to anyone. 14 of 14 people found the following review helpful Psychology - April 8, 2010 I COMPLETED A DEGREE COURSE IN PSYCHOLOGY AT ASHWORTH AND I

I obtained my Associate of Science in Criminal Justice from Ashworth. Overall I had a great experience with them. In fact since I have obtained an Associates Degree I have applied to four regionally accredited colleges that have accepted my credits. I recently decided to major in business for my Bachelors Degree. I began this quest at the University
of Phoenix, who would accept their credits. I loved their program but it had so many time constraints for the assignments. I was unable to continue with them because I am a Police Officer with a rotating schedule, and I am also a Youth Pastor so my time is limited. I then transferred to Kaplin University who accepted my whole Associates Degree from
Ashworth. Kaplan has a great program also but their are also some time constraints involved. So at this time I am about to start back at Ashworth, because of it is self paced, and it is a quality program that I can learn in without time restraints. Their tution is also much cheaper, and they have a no interest payment plan, this is great because I won't
have a large amount of debt when I finish school. Let's say that I am going back home so to speak. Their credits are now more widely accepted by regionally acce
regionally accredited or nationally accredited or nationally accredited. Lastly I would check with potential employers about their acceptance as well. Certain bodies of various certifications will only take regionally accredited degrees. My mother decided on the school and against my better judgement enrolled me into JMHS and paid the down payment (i had to pay the additional 700 of the 900 they
were asking just to earn a diploma). Now I can say at that time I had no problems receiving any materials and my assignment, double check with the school to make sure I had nothing else I needed to send in. Everything is complete and I should receive my
diploma in the mail within 30 days, at least that is what im told. Not the case. I moved out of state around two weeks after completing my work. I ended up doing alot of traveling as well and assumed my parents would hold on to my diploma to get into

area and he confirmed it. He said that they have this problem all the time. People take these NATIONALLY accredited online courses, not realising that they will not be accepted by the state education department. He told me to go to my local community college. In New Hampshire you can take 3 credits per semester in early childhood education, free
(worth $600)if you work in a state registered center. Maybe your state has something similar? If you want to learn as a hobby, then this college is great. If you may as well present your employer with a diploma written on toilet paper. THEY WILL PROBABLY NOT ACCEPT THEM. These people will tell you anything
to get you to sign up. They told me FOUR times that their early childhood education course would be accepted by the education department. At the New Hampshire state level (which is what counts) THEY ARE NOT. Stupid me for being so trusting. I didn't expect to be repeatedly told such bare faced lies. The debate about whether or not they will
transfer is a red herring. What matters is that they are not accepted by many employers. Check Ashworth out on the Better Business Bureau site. As I type they have a D+. If you have already signed up and try to cancel, they will tell you that you have to pay a cancellation fee or (as in my case) kept calling me to demand that I pay $900 for the rest of
the course. Kick up a fuss and refuse. They will back down and put your account to 0.00. Get them to email that to you and send you a hard copy. If you have nothing in writing from these people, then it didn't happen. They know every trick in the book. I suspect that the good reviews are written either by company employees, or those who have not
yet tried to use their Ashworth credits out in the real world. 8 of 16 people found the following review helpful Business Management - December 21, 2009 I have been a student since 2001 first finishing my Associates in Business Management. Then when they added BA, I enrolled in 2008 for BA Business Administration. They were able to transfer all
of my Associate credits and even a few from the regular college I attended. (Not all, but that is normal for ALL schools). I love the sel pace, though as you can see, I don't self pace very well! I took a break from 2005-2008 though. My fince is now enrolled in the MBA for Human Resources. He is 2 classes in and so far it has been challenging and very
affordable compared to most college credits. I would recommend Ashworth for any program as I have seen them all now! 6 of 6 people found the following review helpful Early Childhood Education - October 23, 2009 Do not attend this school if you want to transfer "credits' later on. on the subject everytime, including how to study, they are always on time on shipping my books, I usually receive them before the other course ends; whenever I send an email with a concern I received their response back right away, they are very professional and most of all, this is the first time I have studies the whole book and not in bits and
pieces like they do at a regular college class. I am obtaining knowledge and experience like never before. I have graduated in two courses already and it was a rewarding experience. Additional, their nonfinance payments plan is great for me as I had been a Mom for 20 years and want to update my education. THANKS, ASHWORTH COLLEGE YOU
ARE AWESOME!!! 10 of 12 people found the following review helpful Security Management. I have read some of the reviews. As far as receiving my course material, I requested each semesters books be shipped all at once. I did not have to wait for each book to arrive
seperately. Ashworth did this with no problems. I enjoyed the work at your own pace courses and not having to go to a brick and mortar school. My only complaint, the slow response to emails and long waits on hold when I had to call Ashworth. These are minor issues when compared to the flexibility the courses give you to work at home and on your
time schedule. 5 of 6 people found the following review helpful Associate of Science: Criminal Justice - September 19, 2009 Like every one else, the Student Services Dept. is not all that great. But, for those who are trying to get in the Law Enforcement field, Ashworth is the way to go. Because of Ashworth, two of my buddies are now police officers
for the city of New York. Many police agencies are becoming more strict when it comes to educational requirements. Very few police departments, they want 60 college credits or greater. Look, Ashworth is a self, paced, timed and motivated
school where you will not find yourself pulling your hair out because you have to be in front of your computer when a paper or homework is due. I bet anyone who is enrolled with at online school, the financial, and academic stress they are going through right now. With Ashworth there is no financial stress, and if there is an
academic stress, that's because you're either mentally challanged or plain old stupid. To conclude, they are accredited and recognized by the Distance Education Accreditation (CHEA) as well as The US Department Of Education. If you are still not convinced, then
do some research online about these three accreditation agencies. What more do you want??? $80.00 per semester credit hour, you do the math. And yes their credits do transfer and are accepted by some institutions and universities, not all. Do your Homework before enrolling!!!! 8 of 9 people found the following review helpful Business

I filed for bankruptcy and was told by my attorney to just keep paying any creditor's I wanted to continue with. The school refused to let me continue regardless of my continuing to make payments or if I agreed to pay in full right
away. My attorney refused to write a letter of reaffirmation as he claimed the school shouldn't have needed it. No matter what I do to resolve the situation I keep being told I can't continue. I have to now restart 4 years of schooling
because my attorney and school couldn't find a solution. 3 of 9 people found the following review helpful Associate in Accounting - May 11, 2009 I completed all my courses back in February. They are still indicating that they do not have my final exam and refuse to give me my degree that I worked soo hard for. The final exam doesn't even count

First, use of technology is excellent, I can submit my assignment and get a grade with that some week only once I have had to wait 2 weeks and sent an email. With the materials, I have had to send an email to my book for the next course, but they have always responded with
1-2 business days. Again this is an online course, it may not be for everyone. Tht tuition is affordable for me compared to other colleges in my area. I complete the course work in about six hours total. The materials - The text books are dated. It was 2007 when I was doing the Criminal total to

Waiting to talk to someone that didn't want to talk to someone that didn't want to talk to you or give you a high pressure sales pitch. What, do they work in a boiler room? It's like talking to a collections department at a credit card company "How about making a down payment of $500??"

have some problems with the school early on, but they have worked hard to overcome any issues that they once had. Their student services are now very quick and polite. They really seem like they care. I am proud of the school and the accomplishments that they have done to improve the school. The tuition is unbelievably low! Great job AU! Mark 5
of 7 people found the following review helpful Early Childhood Education - January 7, 2009 I was reading many of the other comments on Ashworth College, and I am different than most. I was impressed, when I first started, at their prices are low, compared to many other schools. I have seen schools with over 14,000 a quarter, and my
program will end up costing a little over 4,000 for an Associates. Also, they sent my materials quickly. I get my books before my current class is even done, and they always assure me to talk with them whenever I have a problem. I am
impresed with their materials. All updated, revisied, etc, with in the last couple years, and the book publishers are good institutions. I have learned hoardes of informations from them, and they give those who may not have lots of time. This program works well for
me, a student with lots of other stuff going on in my life. I am enjoying Ashworth completely. But if you need someone, a teacher and a class, to keep you motivated in studying, then you probably should not do homestudy. I think Ashworth is a great college, 5 stars on their every service and materials! 7 of 7 people found the following review helpful

The course content was good, although some of the material was slightly outdated. Most of the outdated material was slightly outdated material was the result of new Supreme Court decisions or because of updates in Homeland Security.
This is understandable, but I hope they update their material ASAP. One thing that suprised me was how challenging the material really was. I'll admit that when I started, I thought it was going to be a walk-over, especially because all of the exams are "open book". Not so. The writing assignments were tough, particularly in the Introduction to

There is sometimes a great deal of down time between courses if you are waiting for a paper to be graded. Recently, they started allowing students to
submit writing assignments electronically and I was able to get my last two papers turned in and graded within three days. I think the longest I waited was one month for a paper to be graded. $80/credit hour. The only concern you should have before you sign up is contacting any four-year colleges you may transfer to/potential employers and finding out if they will accept a degree from Ashworth. Many regionally-accredited online schools will, but you better shop around first! I've found one already and will be starting my bachelors degree
program in April 2009. To emphasize: do this BEFORE you enroll with Ashworth! For what it's worth, I had a good experience with Ashworth and would recommend it to anyone ONLY if I thought they had the drive and focus to stick with it to the end and did not need a lot of "hands on" from a instructor. As a working adult with a family who already

this, you HAVE to be a self learner. Yes you will be on your own when it comes to doing your courses. I myself found them easy but others might not. Now we come to the issue of shipments... I wait almost 3 months for a semester exam because I forgot there was a required written report to send in. Also you need to constantly be on student services
for your shipments. If you can deal with that then this is not a bad way to get your degree. What you get. If you fail it's because you didn't try. This is only for the associates program. I don't know how their master's program is. 6 of 6 people found the following review helpful Human Resources - June 17, 2008 I have 2 classes (out of

My employer is paying for most of my

15, 2008 I am currently enrolled for BBA programme ... Reading the above comments .... I would like to tell about my experience with Ashworth... I already do hold a Diploma in Basic accounting from Ashworth... I did receive
my Diploma without any hastle. I did get bookkeeper job addign up that in my resume. They recently opened up the Bachelor's ... I wanted to enroll, the staff whom I dealt with were okay...for quite a few lied about the office hours as he did not want to entertain any calls after 4pm. I did complain the matter to the incharge... I have submitted some of
my assignments they are quite challenging I reviewed the books they are using...they are all really informative and really good ones I have to agree with that. You will definitely gain knowledge if you go thru the materials with real interest. once you drop the assignments in the drop box ... the course instructer responds if she needs any or acknowledges
it with comments. You receive the grade within 3 weeks definitely. So far good...when you email them for any query it does take a week to respond though. Ashworth is in my affordability range. Other colleges name. after
experiencing lies and rudeness from two to three colleges...I felt Ashworth is quite okay and it clicked...They responded to me...So I consider that's where I have to get my bachelor's. So I will recommend Ashworth. See the budget, the time, Accredition...Always make sure you know about the college limitations then join. But dont compare the degree
with other colleges this is Distance learning...nationnaly accredited. Thats all. Not that bad... Thats the budget go for it! PS: This is a real statement from a real statement from Ashworth University there are several changes
that have been made which are continuing to improve the Ashworth experience. There is no longer a need to wait endlessly for the semester exams, since you can now access them online. I called them and told them that I was

teacher that helps and guides you through the program. This college is for people who like to "do it on your own!" Also, if you go to Ashworth I would suggest that you stay on top of student services to make sure that shipments are sent... I waited 2 months one time for a semester Exam. After that I would call and remind them that things needed to be
shipped and I didn't have anymore problems! (I know that isn't the student's job... but it could be worse!) I learned a lot through the college to friends and family. (Oh, I would like to mention that you get a

very good college for working parents. 5 of 6 people found the following review helpful PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...PROBLEMS...
may be the same for all colleges. I'm not using this degree to get into a wall street firm. Use the payment plan. 5 of 5 people found the following review helpful Computer Management - September 18, 2006 Student Services needs work, but overall the text books are very informative and I am learning a lot. 4 of 6 people found the following review
helpful AS Criminal Justice - August 22, 2006 Overall, I had a good experience with this school. The only improvement that the school needs is in student services. I completed the AS in Criminal Justice in two years with them. The books and study guides that I received were for the most part current. I would recommend this school. For the cost and
the quality that you get it's worth it. However, I still read about issues with student services. 10 of 13 people found the following review helpful OnlineDegreeReviews.org is not affiliated with Ashworth College in any way.
